**EXCEL KNOWLEDGE
INTERNATIONAL SCHOOL**
KURUVAMBALAM, PERINTHALMANNA

Strong minds

Noble futures.

Your child will be known here
– not just taught.

Choosing your child's first school is one of the most personal decisions a family ever makes. You are not looking for a brochure full of promises. You are looking for somewhere your child will feel safe, be cared for, and quietly grow into their best self.

With warm regards,
Dr. Mohamed Ibrahim
PRINCIPAL, EKIS

That is exactly what we have built at Excel Knowledge International School. Our day school for KG1 to Grade 5 brings together two things that too often live apart: a genuinely future-ready CBSE education, and a steady moral foundation rooted in our values.

We are a young school with deep roots. The experience behind us — built across the UAE and India over more than twenty-five years — means we did not start from nothing. We started from everything we have learned about what helps children flourish.

Come and see us. Walk the campus, meet a teacher, watch a class. The right school should feel right the moment you step inside. We think ours will.

Holistic Education for Lifelong Success

Six reasons families trust us

➤ Values, never optional

A real moral foundation, woven through every day — not a subject on the timetable.

➤ A strong start

The national curriculum, taught with care so your child reads, reasons and writes with confidence.

➤ Future-ready from KG

An AI & Robotics lab and smart classrooms introduce technology early — gently and ageappropriately.

➤ Safe & nurturing

A secure, supervised campus and caring staff, so small children feel held all day.

➤ UAE-trusted leadership

Management seasoned across the UAE and India — familiar to Gulf families, present for local ones.

➤ One unbroken journey

Begin in KG and continue toward a NEET/JEE-ready senior school — one school, one family.

Before the marks, the medals
and the careers, there is a
child learning to **love**
learning.

That child is where we begin. At Excel Knowledge International School, the early years are not a warm-up for the real thing — they are the most important years of all. We treat them that way.

*Building Strong Minds,
Shaping Noble Futures.*

A New School, *built on a long foundation of trust.*

Excel Knowledge International School is new — and that is exactly why we can be different. We have designed our KGI-Grade 5 day school from a blank page, with everything a modern, values-led education should be, and none of the habits a school accumulates over decades.

But newness here does not mean inexperience. EKIS is led by a management team with more than twenty-five years in education across the UAE and India — and stands alongside our established residential school, already trusted by families to raise and teach their children well.

What you get is the best of both: the energy and ambition of a fresh start, carried by people who have done this, carefully, for a very long time.

25+

*Years of education experience
behind the school, across
the UAE and India.*

KNOWLEDGE
INTERNATIONAL SCHOOL

From play to mastery, *one confident step at a time.*

In the primary years, the joy of the early classroom grows into real academic strength. Children become fluent readers and clear writers, confident with numbers, and curious about the world around them.

Lessons follow the innovative curriculum, taught in bright, interactive classrooms that keep learning active rather than passive. By Grade 5, our pupils are not just ready for what comes next — they are eager for it.

The first thing *every parent needs to know.*

Before a child can learn, they must feel safe. We say this plainly, and only what we can stand behind — because trust is built on honesty, not on promises a school can't keep.

Our Missions :

- ➔ Provide a world-class, values-based education that fosters academic excellence, moral integrity, and lifelong learning.
- ➔ Nurture each student in a safe, structured, and emotionally supportive environment, ensuring their physical, mental, and emotional well-being.
- ➔ Empower students to become confident, future-ready leaders who are compassionate, culturally aware, and socially responsible global citizens.
- ➔ Inspire a spirit of curiosity, creativity, and critical thinking, laying the foundation for innovation and problem-solving.
- ➔ Uphold strong moral values and cultural heritage, while embracing global standards to prepare students for a rapidly evolving world.
- ➔ Promote holistic development through a balanced focus on academics, character building, co-curricular enrichment, and life skills education.

**CODING
ROBOTICS
AND AI**

The room where curiosity **meets the future.**

Children today will grow up alongside technology we can barely imagine. We don't wait until it feels urgent — we begin early, and gently.

Our AI & Robotics lab and smart, interactive classrooms turn screens-and-buttons into something children do, not just watch. For our youngest, that means simple, playful introductions to how machines think and how problems get solved — building the confidence to be makers, not just users.

It is the same future-ready spirit that runs all the way up our school — started here, at exactly the right age.

**Future
Ready
Learning**

*The whole school rests on the
person at the front of the room.*

You can have the finest building and the latest technology, and none of it matters as much as a good teacher who knows your child. So that is what we hire for — warmth first, then skill, then the patience the early years demand.

Our teachers are trained to teach young children specifically: to read a room of four-year-olds, to turn a wobble into a win, and to make every child feel they are exactly where they belong.

And because we are one school, the people who teach your child in KG share standards and purpose with those who will guide them years later. The care is continuous.

*Room to read, create,
move and grow.*

A childhood is more than lessons. Our campus gives children space to find what they love — and the time to love it.
